Customer Satisfaction Survey for NeuroWatch System

We are building an **AI-based Proctoring Examination Tool**, designed to ensure fair, secure, and efficient online assessments.

Unlike traditional online exam systems, our solution focuses on:

1.Real-time AI monitoring to detect suspicious activities

2.Facial recognition for identity verification

3.Behavior analysis to prevent cheating

4.Automated flagging and reporting for instructors

The goal is to create a reliable, scalable, and stress-free examination environment for both students and institutions.

Your responses will help us improve this system and make online exams more secure and trustworthy.

⏱️ Takes only 1–2 minutes.

The respondent's email (**raianshika17@gmail.com**) was recorded on submission of this form.

Email *

raianshika17@gmail.com

Name *

Anshika rai

What is your current role? *

- (●) Student
- ( ) Working Professional
- ( ) Other: _____

What is your age group? *

- ( ) 16-18
- (●) 18-22
- ( ) 22-26
- ( ) 26+

Awareness & Perception of Online Exam Integrity

Do you think cheating is common in online exams? *

- ( ) Very Common
- ( ) Common
- ( ) Rare

How serious is this problem according to you? *

	1	2	3	4	5	
Not Serious	( )	( )	( )	( )	( )	Very Serious

Have you seen or experienced cheating during online exams? *

- (●) Yes
- ( ) No

What type of cheating have you noticed? *

- [ ] Using mobile phone
- [ ] Looking away from screen
- [ ] Getting help from others
- [ ] Switching tabs
- [ ] Using notes/materials
- [ ] Other: _____

Suggestions & Expectations for AI-Based Proctoring System

What features would you like to see in an AI-based proctoring system? *

- [ ] Face recognition
- [ ] Eye movement tracking
- [ ] Tab-switch detection
- [ ] Audio monitoring
- [ ] Other: _____

How should the system respond to suspicious behavior? *

- ○ Warn the student immediately
- ○ Notify examiner
- ○ Record and review later
- ○ Combination of all

How important is user privacy in such systems? *

	1	2	3	4	5	
Not Important	○	○	○	○	○	Very Important

Adoption, Trust & Final Feedback

Would you be willing to use an AI-based proctoring system? *

- ◉ Yes
- ○ No
- ○ Maybe

Do you think institutions should adopt AI-based proctoring? *

- ○ Yes
- ○ No
- ○ Maybe

Would you recommend this system if it is implemented? *

- ○ Yes
- ○ No
- ○ Maybe

Customer Satisfaction Survey for NeuroWatch System

We are building an **AI-based Proctoring Examination Tool**, designed to ensure fair, secure, and efficient online assessments.

Unlike traditional online exam systems, our solution focuses on:

1.Real-time AI monitoring to detect suspicious activities

2.Facial recognition for identity verification

3.Behavior analysis to prevent cheating

4.Automated flagging and reporting for instructors

The goal is to create a reliable, scalable, and stress-free examination environment for both students and institutions.

Your responses will help us improve this system and make online exams more secure and trustworthy.

⏱️ Takes only 1–2 minutes.

The respondent's email (**jeeadvance09@gmail.com**) was recorded on submission of this form.

Email *

jeeadvance09@gmail.com

Name *

Sujal patil

What is your current role? *

- (●) Student
- ( ) Working Professional
- ( ) Other: _____

What is your age group? *

- ( ) 16-18
- (●) 18-22
- ( ) 22-26
- ( ) 26+

Awareness & Perception of Online Exam Integrity

Do you think cheating is common in online exams? *

- ( ) Very Common
- (●) Common
- ( ) Rare

How serious is this problem according to you? *

	1	2	3	4	5	
Not Serious	( )	( )	( )	( )	(●)	Very Serious

Have you seen or experienced cheating during online exams? *

- (●) Yes
- ( ) No

What type of cheating have you noticed? *

- [x] Using mobile phone
- [ ] Looking away from screen
- [x] Getting help from others
- [x] Switching tabs
- [ ] Using notes/materials
- [ ] Other: _____

Suggestions & Expectations for AI-Based Proctoring System

What features would you like to see in an AI-based proctoring system? *

- [x] Face recognition
- [ ] Eye movement tracking
- [x] Tab-switch detection
- [x] Audio monitoring
- [ ] Other: _____

How should the system respond to suspicious behavior? *

- ○ Warn the student immediately
- ○ Notify examiner
- ○ Record and review later
- ◉ Combination of all

How important is user privacy in such systems? *

	1	2	3	4	5	
Not Important	○	○	○	○	◉	Very Important

Adoption, Trust & Final Feedback

Would you be willing to use an AI-based proctoring system? *
